TURKEYS

Farm Production, Disposition, and Gross Income 1960-61

Turkeys raised in 1961 totaled 108.1 million birds--28 percent more than the previous record crop of 84.7 million birds in 1960. The number raised was above a year earlier in all regions. Increases were 33 percent in the South Central, 32 percent in the East North Central, 30 percent in the West North Central, 25 percent in the South Atlantic, 24 percent in the West, and 8 percent in the North Atlantic States.

Minnesota was the leading State in number raised with 18.6 million, followed by California with 17.8 million. Iowa raised 9.8 million, Wisconsin 6.2 million, Missouri 5.7 million, Virginia 5.4 million, Texas 4.8 million, Indiana 4.1 million, Utah 3.8 million, and Ohio 3.6 million. The West North Central States, the region of largest production in the United States, raised 36 percent of the Nation's turkeys in 1961, the West 24 percent, the East North Central about 16 percent, the South Atlantic about 11 percent, the South Central 10 percent, and the North Atlantic 3 percent.

Breeds Raised: Turkey growers raised 95.4 million heavy breed turkeys in 1961, compared with 74.4 million a year earlier--an increase of 28 percent. Heavy white breed turkeys raised in 1961 were 34 percent of all heavies, compared with 30 percent in 1960. Light breed turkeys accounted for 12 percent of the total raised.

Turkey Sales: Turkeys sold in 1961 (including home consumption) totaled 108.3 million head. Growers indicated that they sold as fryer-roasters 74 percent of their light breed production, 32 percent of the heavy whites, and 1 percent of the other heavies.

Prices and Gross Income: The average price received for turkeys sold in 1961 was 18.9 cents, compared with 25.4 cents a year earlier. Prices received by farmers during the heavy fall marketing season were down 8 cents a pound from 1960, the lowest since 1940. Gross income from sales of 1,885.5 million pounds live weight of turkeys in 1961 totaled \$356.5 million -- 4 percent less than in 1960.

Death Loss: Loss of poults in 1961 was 9.6 percent of those started, compared with 8.8 percent in 1960. Loss of breeding stock as a percent of breeders on hand January 1, 1961 was 5.3 percent, compared with 5.1 percent a year earlier.

January 1 Breeder Hens Holdings: Holdings of heavy breed turkey hens on January 1, 1962, were 3.5 million--a decrease of 10 percent from the previous year. Light breed hens totaled 341,000--down 25 percent from January 1, 1961. The number of other turkeys (market birds and breeder toms) on hand January 1, 1962, at 2.5 million, was 4 percent above a year earlier.

1/ Does not include young turkeys lost.

2/ Loss during the year of turkeys on hand January 1. Less than 500 is shown as 0.

3/ Production is the number (or pounds) available for utilization during the year, i.e., sales and home consumption plus or minus the change in inventory. Production also equals the number (or pounds) raised minus death loss of birds on hand January 1.

4/ Change in inventory numbers during the year.

5/ Includes consumption in households of producers which is less than 1 percent of production for the United States.

1/ Does not include young turkeys lost.

2/ Loss during the year of turkeys on hand January 1. Less than 500 is shown as 0.

3/ Production is the number (or pounds) available for utilization during the year, i.e., sales and home consumption plus or minus the change in inventory.

Production also equals the number (or pounds) raised minus death loss of birds on hand January 1.

4/ Change in inventory numbers during the year.

5/ Includes consumption in households of producers which is less than 1 percent of production for the U.S.
